About Sustainabyte:

Sustainabyte is a private limited company, based out in Chennai, with client base spreading across 3 countries. It is a climate-tech start-up, predominantly focussing on energy conservation methodologies across Industries, Commercial building and residential complexes.

Sustainabyte.ai is dedicated to leveraging advanced technology for global sustainability. Our mission is to minimize environmental impact while enhancing operational efficiency through innovative solutions

Sustainabyte is a technology-driven sustainability company, providing cutting-edge solutions for enterprises, to identify, plan and operationalize their Net Zero Carbon ambitions.

Our mission is to deliver sustainable prosperity for companies, by balancing people, planet and profit. We demonstrate this by leveraging proprietary machine-learning algorithms, which provide measurable outcomes.

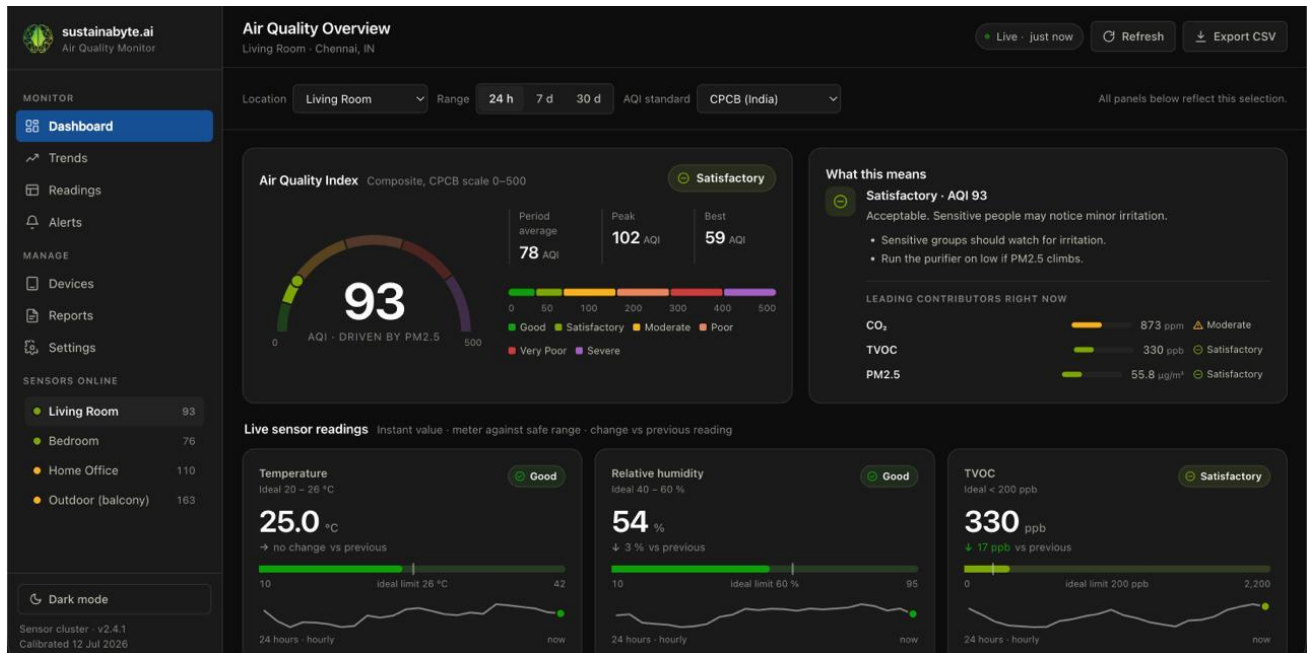

Our goal is to collaborate with companies and help them to work smarter, make critical decisions more quickly and consume less. In addition, by doing this at scale, we will make a significant impact on the carbon footprint of commercial and industrial assets, globally. At Sustainabyte, we understand how important it is to be productive and sustainable. As a first step, we provide expert advisory to create a blueprint for sustainability roadmap and Net Zero Carbon Goals.

We implement our flagship IoT solution — OptiByte — our technology platform, as an overlay on the client's existing systems, connecting data points to provide a bird's eye view, which, really is making the invisible, visible. Our reporting module then presents the ESG scores, operational efficiency KPIs and compares it against the milestones.

This drives a program of continuous improvement by identifying improvement opportunities and recommended changes to deliver empirical and tangible sustainability goals. We pride in delivering results as early as in 30-60 days.

Climate change is the biggest humanitarian crisis staring in our face today, and we must act now to decarbonize and protect our planet for future generations. Our mission is to create a balance between people, planet, and profit, which balances the 3 key pillars of any business- Sustainability, Operational Excellence and Workplace.

Commercials:

S.No	Description	Quantity	Price
1	WIFI Enabled IAQ Sensor Power supply:24 VAC/VDC Power Consumption:24 VAC(3.8VA) / 24 VDC (1.5W) Operating Temperature: 32 °F to 122 °F (0 °C to 50 °C) Operating Humidity:0% to 95% RH (non-condensing) Enclosure Rating: IP20 (Polycarbonate material) Dimensions/Weight: Net Weight of 0.42 lbs(189 grams) ELECTRICAL CONNECTION :1/2" NPTF	3	165000
2	IAQ Monitoring Software including Cloud-based / On-premises Energy Monitoring Platform with Real-time data collection and visualization, Historical data storage and Trend Analysis, Customizable Dashboards and Reports, User access control and role-based permissions.		
3	Software Subscription (Second year onwards)	3	9000

Total	₹ 1,74,000
--------------	-------------------

Terms and Conditions:

- Payment schedule: 100% payment for hardware advance against the PO.
- Applicable taxes and duties will be extra
- Delivery Period: Within 5-6 weeks from date of receipt of advance along with P.O.
- Warranty: 12 months from the date of installation or 18 months from the date of dispatch whichever is earlier.
